SYCOMP SCET

Skill Development Core Java

Assignment 10

CODE:

```
//Program to print the specified grid

import java.util.Arrays;

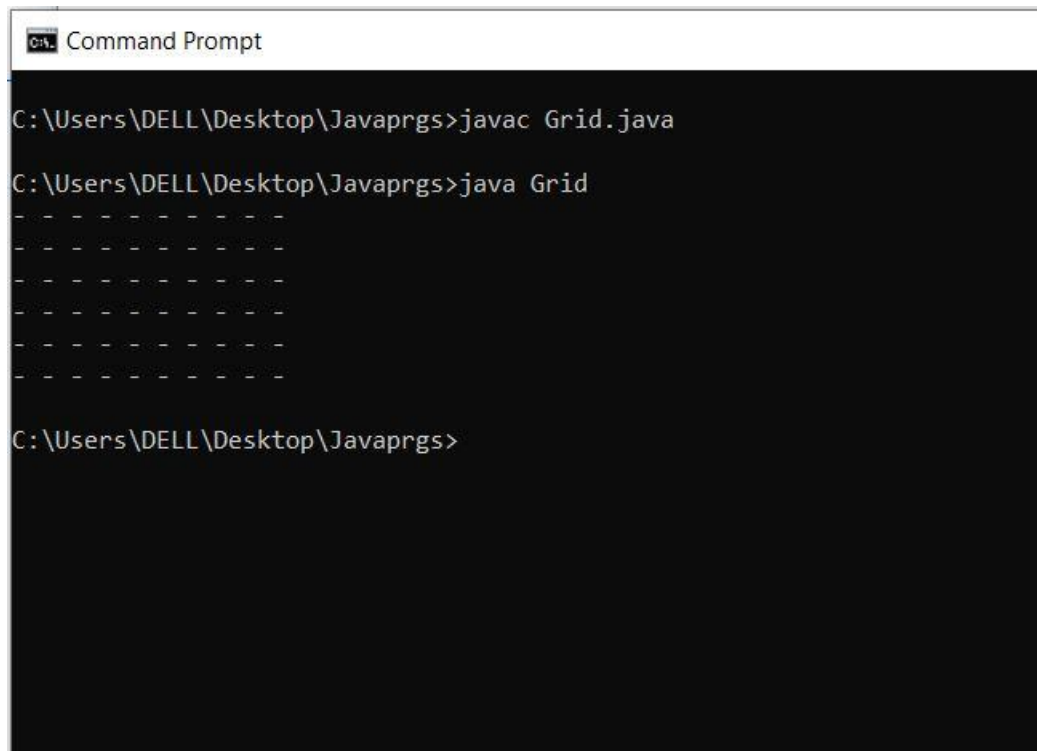

public class Grid
{
    public static void main(String[] args)
    {
        //declaration of array
        String [][]arr = new String[6][10];

        //giving input in 2D array
        for(int i=0;i<6;i++)           //iterating over rows
        {
            for(int j=0;j<10;j++) //iterating over columns
            {
                arr[i][j]="-";
            }
        }

        //printing grid thus 2D array
        for(int i=0;i<6;i++)           //iterating over rows
        {
```

```
        for(int j=0;j<10;j++) //iterating over columns
        {
            System.out.print(arr[i][j]+" ");
        }
        System.out.println();
    }
}
```

Output:

```
Command Prompt

C:\Users\DELL\Desktop\Javaprgs>javac Grid.java

C:\Users\DELL\Desktop\Javaprgs>java Grid
- - - - -
- - - - -
- - - - -
