JAVA ASSIGNMENT 15

CODE:

```java
public class Car
{
        String brand;
        Car()
        {
                brand="FORD";
        }

        String getBrand()
        {
                return brand;
        }

        public static void main(String args[])
        {
                //not passed anything
                Car nm=new Car();
                System.out.println("Default brand name: "+nm.getBrand());
        }
}
```

OUTPUT:

```
Default brand name: FORD
```
